

3M™ Solus Safety Eyewear 1000 Series

For Illustration
Purposes Only

Uncoated

When microscopic water droplets land on the lenses, they bead up and form condensation and fog, obscuring your vision.

Scotchgard™ Protector coated

Scotchgard™ Anti-Fog Coating produces a reduced-contact angle, flattening the water beads into a thin, transparent film of water that allows light to pass through.

The facts are clear

Transition from **cold to warm** environments, hot & humid conditions and climate-controlled areas.

The coating **retains its effectiveness** for at least 25 washings, allowing workers to wear their eyewear longer.

Helps workers see **clearly longer**, because the coating, with its active ingredient, is bonded to the lens.

The coating **can be disinfected** by soaking with diluted bleach or by using alcohol wipes and won't lose its anti-fog performance.

Designed for **physically demanding** tasks.

Meets the requirements of CSA Z94.3 and ANSI Z87.1.

Help workers see clearly, longer.*
