POINT SELECTION GUIDE

PLAIN CUP POINT

Used to fasten shaft collars, gears or knobs to shafts.
Used against hardened surfaces or when frequent adjustments are needed and where no locking point is required.

KNURLED CUP POINT

Similar to Plain Cup point, but where vibration may be a problem. Knurls lock onto seating material and prevent screw from loosening.

FLAT CUP POINT

Used when parts must frequently be reset. Causes very little or no damage to the part it seats against.

OVAL CUP POINT

Used when frequent adjustment is needed without deforming or damaging the mating surface. Also used in seating against an angular surface.

CONE POINT

For permanent location of parts. Deep penetration of point gives the highest holding power.

HALF DOG POINT

Used for permanent location of one part to another. Point is often set into a drilled hole. May sometimes take the place of a dowel pin.

 Listed tightening torques are 75 percent of the torque to yield based on ASTM574.
 Values based on unplated and non-lubricated fasteners.

Warning: The data in this book should be used as a reference guide. The proper torque can only be determined by analysing the design parameters which include temperature, plating, lubrication, etc. Short time tensile, creep and stress relaxation should be considered for applications where the temperature exceeds 200 C. Lower ductility, impact strength and fatigue life must be considered for screws subject to temperatures below -29 C. All socket screw products are class 3A Fit except sizes 1-1/4 and larger which are class 2A Fit.

ABOUT BBI

Best Socket Screw started in business in New York, N.Y. in 1965 and was located at 3 Howard Street in what is currently known as the SoHo district of New York City. The founders, Mr. Stan Sevell and Mr. Perry Rosenstein, both had extensive experience in the distribution of fastener products both locally and nationwide. In 1971, the two entrepreneurs purchased the assets of Brighton Socket Screw Manufacturing, a quality manufacturer of Socket Screw products in Cincinnati, Ohio. By joining the two companies together, Mr. Sevell and Mr. Rosenstein created Brighton-Best Socket Mfg. Inc., a company that would ultimately become a major supplier of socket screw products in the United States.

By 1975, Brighton-Best had opened 12 warehouse distribution centers throughout the US and was looking for expansion opportunities abroad. The first foreign expansion came in Toronto, Canada and the opening of four other warehouses in Canada quickly followed suit. Over the next 20 years, Brighton-Best Socket Screw continued to open distribution centers in the USA, UK, Brazil, Mexico, New Zealand, Argentina and Australia. Brighton-Best is currently located in 34 locations in 5 countries and supplies over 7,000 distributors throughout the world.

On January 2, 2008, Brighton-Best Socket Screw Mfg. was bought by a consortium of investors from Taiwan headed by Mr. Robert Shieh, President of Ta Chen International, Inc. (www.tachen.com). In 1986, Mr. Shieh founded Ta Chen International, Inc., a dominant supplier of valves, pipe, bar, coil, sheet and flat plate in stainless steel and other non ferrous materials. Ta Chen has distribution warehouses in 8 major industrial markets in the United States with corporate headquarters located in Long Beach, California.

The newly formed company, Brighton-Best International, Pty Ltd (BBI), will offer new products, more extensive inventory, world class service, quality products, and a new 24 hrs online web ordering website.

Brightonbest.com will give the customer the opportunity to check stock, receive instant quotations, place orders, monitor order status and access material certification reports all without having to dial a single number or wait on hold.

All the employees of Brighton-Best International, Pty Ltd look forward to the challenges of the future and hope through our dedication to quality products and superior service, Brighton-Best will be your first call when it comes to fasteners.

Five key points of interest

Accessibility

The Brighton Best web site offers accessibility to check inventories and pricing and place orders "real time" 24 hours a day, 7 days a week. This enables our customers the ability to provide their customers with immediate pricing and availability.

Simplicity

A series of easy entry steps gives our customers the ability to quote on-line via the Brighton Best web site. Our site is user-friendly and intuitive, allowing customers with quick access to pricing and inventory information without redundant phone, fax or entry tasks.

Purchase Order and Invoice Inquiry

The BBI web site allows our customers to monitor order status, track and/or expedite order and shipments on-line. Invoices can also be accessed on the web and printed locally, saving time and money!

Part Number Cross Reference

BBI offer the ability to all our customers to have their part numbers loaded onto BBI system, allowing customers the ability to check inventory and pricing by simply entering their part number.

Material Certification Test Reports

Product test reports are available on-line via the BBI web site, eliminating the need to include and track hard copies with each shipment and subsequent lot number.

For further enquiries about using the web site and delivering your business efficiencies our industry has never seen before, please contact your Local BBI office.
