

# 5S Marking Starter Kits

## Product Description

Help your customers create a 5S working environment with a 5S Marking Starter Kit.

- 5S relies on the use of border lines and ID labels to clearly identify the proper storage location for all items used in the lean work environment.
- These markings serve to sustain workplace organization by making it easy to tell at a glance when something is out of place.
- Brady's 5S marking supplies are designed for use on workbenches, tool boards, stocking shelves and other above-the-floor applications.
- These marking supplies allow you to quickly apply borders, corner marks and outline silhouettes (or shadows) to a wide variety of surfaces
- Use in conjunction with durable text and bar code labels created on a Brady industrial label printer to ensure that there is a place for everything and everything remains in its place.
