

## Rubber Back-up Pads

### Description and Applications

- Rubber Back-up Pads - Use with coarse grits
  - Spiral ribs provide contact points and form channels for air flow, extending disc life 30% to 50%.
  - Improved mechanical and chemical bond between rubber and metal provides increased airflow and higher RPM ratings.
  - Larger air holes provide cooler operating area and longer abrasive disc life.
  - Flexible Rubber Pads are recommended for contours and Rigid Pads will last longer on aggressive grinding applications.
