Nitrile Chemical Resistant Gloves

#NIF3018

Nitrile gloves offer many benefits. Three times stronger than latex, they offer exceptional puncture resistance in addition to great abrasion and snag resistance, and perform in a wide range of temperatures.

They resist oils, fuels, and certain organic solvents, making them a great choice for food processing, chemical processing, machining operations using cutting oil, and battery manufacturing. And they are a great alternative for those with latex allergies.

These flock-lined gloves have an embossed finish for a better grip.

#NIF3820 flock lined, green, 15" length, .020" thick, Sizes 7 - 10
