Dexterity®

Nitrile Dipped Work Gloves

#S15NT

The tough nitrile dipped coating on Dexterity® gloves provides abrasion and puncture resistance. The combination of the unique 100% cotton seamless knit shell and the ergonomically designed curved hand and finger shape gives this glove impressive comfort and dexterity.

Nitrile is a co-polymer of acrylonitrile and butadiene. Because nitrile is one-hundred percent synthetic it is stronger than natural rubber, does not cause allergic reaction and therefore has a wider range of applications.
