13-gauge Nylon Glove with Micropore Nitrile Palms

#S13PNT

This glove design utilizes the latest developments in 'micropore' technology by infusing the nitrile coating with millions of tiny pores. In simple terms, these pores displace oils and liquids when pressed against smooth surfaces, and create a kind of suction that further increases grip. Great comfort, dexterity and grip, and perfect choice for work around sharp or jagged metal or handling oily parts.

The addition of the micropore coated palms provides grip and boosts puncture and abrasion resistance, all without adding bulk or reducing touch sensitivity.

Gloves provide good abrasion and puncture resistance. Fine-gauge, 100% nylon, seamless-knit shell is non-linting and breathable. Great comfort, dexterity and grip, and perfect choice for work around CNC machines, handling oily metal parts and more.

## TESTIMONIAL

Infinity Support Services

"I have used the gloves you sent me almost daily. I really like your company's gloves. The gloves seem to be holding up really well. I like that I can hold a ¼ drive tool and pick up, install, and remove small hardware that is covered in hydraulic fluid, oil, and fuel. I believe Superior Glove has a great product."

# DEXTERITY®

### FEATURES

- Micropore nitrile coating provides excellent grip by displacing oil on slippery surfaces
- Nitrile coating keeps hands dry; oils and liquids will not soak through to palm
- Black color on palms hides dirt and stains
- Fully launderable

### APPLICATIONS

- Oily Metal Parts
- Automotive
- Metal Stamping
- Small Parts Handling
- General Maintenance
