Description:

EP series of formed faceshield visors offers a variety of different sizes to be used in a variety of applications. All visors come with strategically located slots to fit a variety of different headgears and cap-mounted brackets. This series offer the options of two different material (PETG & PC) and two different thicknesses (.04" & .06"). Visors are available in clear for inside and low-light use and green to help in minimising glare while working outside or in high-luminous environments.
