

Model: EPDP11 Dyna-Ray Polarized Series of Protective Eyewear

EPDP11A

Description:

EPDP11 Dyna-Ray is a series of Polarized safety sunglasses. This series combines a contemporary design with performance and comfort. It offers three fashionable styles and lens colors. It has a polarized dual-lens system that eliminates extreme glare from scattered light, improves contrasts recognition and increases visual acuity. The EPDP11 series comes with a half-frame design. Its soft nosepiece and co-injected temples prevent slipping and increase comfort. Lenses are treated with the exclusive 4A coating (Anti-Scratch, Anti-UV, Anti-Static & Anti-Fog). The EPDP11 series protects against dangerous UV rays from the sun. Besides, it filters out blue light and minimises eye-fatigue. These sunglasses come with microfiber pouch.
