

Milwaukee 48-59-0260 Multi-Bay 12-Volt to 18-Volt Slide Style 3 Bay 45 Minute Battery Charger

Technical Details

- Multi-bay charger that charges up to 3 Milwaukee battery packs (12 to 18-volt) simultaneously
- 45 minute fast charge mode brings batteries up to speed quickly
- Rugged construction to withstand the job site environment
- 1 to 4-hour top-off mode reconditions packs after fast charge
- Weighs 13.2 pounds; 5-year warranty

The Milwaukee multi-bay charger charges up to three Milwaukee battery packs in 45 minutes or less. It has a steel handle and a blow-molded base for impact protection, and can survive an 8-foot drop to concrete. The steel handle shields the charger and battery packs from falling objects, accidental kicks, or knocks on the job site.

The multi-bay charger is also a convenient way to store and carry batteries when they're not in use. After the charger goes through the 45-minute fast charge, the battery can either be removed for use or allowed to remain on the charger to go through the top-off mode process. The top-off mode reconditions the battery pack during every charge to provide longer pack life and increased tool performance. The multi-bay charger accepts all Milwaukee slide-on style 12, 14.4, and 18-volt batteries, and it comes generator and inverter ready. It measures 16.4 by 10.9 by 9.7 inches, and comes with a 5-year limited warranty.

Product Description

Charges up to 3 Milwaukee battery packs in 45 minutes or less! After charging, the battery can remain on the charger in top-off mode to be re-conditioned for longer pack life and increased tool performance. Multi-Bay Charger has a steel handle and a blow-molded base for impact protection - even from an eight-foot drop to concrete!
