

JBC SERIES BEAM CLAMP WITH LOCKING SCREW - 2 TON

Product # 120605 | Model # JBC-2

- Can be used for suspending loads or inverted as a clamp for vertical lifting of flanged beams
- Jaw design reduces stress on beam flanges by distributing load away from edges
- Equal width jaws assure best possible stability
- Threaded handle allows for ease of installation and portability
- Special locking screw mechanism ensures the unit stays tight, increasing safety
