

JET-KUT GOLD JOBBER LENGTH BITS - M2 135° SPLIT PT BRONZE OX. FINISH - 1/2"

Product # 570282 | Model #

- JET-KUT® GOLD drill bits are the most advanced drill bits available in the Canadian market
- These bits feature razor sharp 135° split point self centering tips, eliminating “walking” and the need for centre punching and penetrate on contact
- The superior bronze oxide (gold) ground flute finish reduces friction, allowing outstanding drilling performance with less operator pressure
- Special flute form enhances chip ejection, reduces drill retractions (woodpeckering) and improves coolant flow to the tip
- Heavy duty, high molybdenum steel offers greater strength and rigidity, longer lasting cutting edges and improved hole tolerances, permitting higher feed rates
