TOOLJAW® — The Toolholder Clamp Champ

Lyndex-Nikken ToolJaws are machinists' favorite tooling setup fixtures because they are so handy and practical. Load a toolholder into a ToolJaw. You'll gain immediate access to both the working end and the taper end and your toolholder will be secured by a vise-tight grip.

Easy to use, just place or mount your ToolJaw in a convenient spot and slip a holder into its cradle. Raise the flange lock and secure it with an easy-to-grip thumb screw.

ToolJaw provides maximum toolholder accessibility with minimum handling. Less handling means fewer chances of costly toolholders being dropped or damaged. Save the time and the hassles of using yesterday's toolholder loading and unloading techniques, and save the money you would spend on replacing damaged toolholders.

Features

- Access both ends of your toolholders simultaneously.
- Minimize toolholder handling.
- Speed up your setup.
- Proven performance in the world's top shops.
- Convenient and practical.
- Easy to use.

TOOLJAW® CLAMPS

Nikken Tool Clamper, Tightening Fixtures and ATC Alignment Kit

Nikken Tool clamper is designed for symmetrical holders without drive key slots or U-groove. By changing the clamper head to the suitable size, the same base can be used for the other taper sizes.

NIKKEN TOOL CLAMPER FOR HSK TOOLING

Taper	Tool Clamper Complete Unit	Base Part Number	Head Part Number
HSK32E	TCL-32GH	TCL-BD	TCL-32HD
HSK40A, 40E	TCL-40GH		TCL-40HD
HSK50A, 50E	TCL-50GH		TCL-50HD
HSK63A, 63E, 63F	TCL-63GH		TCL-63HD
HSK100A	TCL-100GH		TCL-100HD

TIGHTENING FIXTURES

Part Number	Taper	Length	Diameter
30-LCFX	30	3.54"	2.17"
35-LCFX	35	3.61"	2.36"
40-LCFX	40	4.27"	2.76"
45-LCFX	45	5.31"	2.95"
50-LCFX	50	6.20"	3.94"

ATC ALIGNMENT KIT

The Automatic Tool Changer (ATC) allows for service on your machine to check alignment of the ATC arm with the spindle and magazine. One taper adapter can be used with multiple flange adapters. For example: the 40 taper adapter can accommodate both CT40 and BT40 flange adapters.

Part Number	Taper
ATC-ALIGN-#40	#40
ATC-ALIGN-#50	#50
ATC-ALIGN-HSK63A	HSK63A
ATC-ALIGN-HSK100A	HSK100A

The ATC Alignment Kit consists of :

- a taper adapter
- a flange adapter
- a bushing
- a centering pin

PointFinder™

**Locate the precise relative positioning of the workpiece to the spindle
– measuring directly from the spindle itself.**

• **Advanced conductive detection system**

- Instant LED response
- Direct action—no relays
- Works with all metals
- Unaffected by cutting oil

• **Precise**

- Position detection accuracy: +/- 0.0008"
- Stylus recovery accuracy: +/- 0.00004"
- Stylus to shank concentricity: +/- 0.0008"

• **Overrun protected**

- X-axis and Y-axis: 0.400"
- Z-axis: 0.200"

• **Versatile design**

- Convenient 1" straight shank configuration
- Projects 4.40" from holder when fully loaded

• **Hardened, precision ground steel construction**

PointFinder™ is an all-in-one replacement for primary axis setters, calipers, and depth and centering gauges. Not only is it quick and easy to use, its accuracy is beyond compare.

Simply load it into a toolholder and mount it into the machine's spindle. Gauge length pre-setting is unnecessary for X- or Y-axis coordinate determination. Move PointFinder slowly along either the X- or Y-axis toward the workpiece. Its bright LED flashes at the exact point where its 1/4" diameter probe touches the workpiece's surface. That point is exactly 1/8" away from spindle center. Z-axis coordinate determination requires pre-setting, and the point of probe contact marks the exact Z-axis coordinate.

With the workpiece locked into position, your other measurements are performed with the same ease and speed.

Features

- Position your workpiece without primary axis setters.
- Measure without calipers.
- Set depths, find centers without gauges.
- Fast, easy and accurate.
- Turn expensive setup time into profit-making production time.

Part Number	Description
PF-2	PointFinder with a 2" Stylus
PF-Stylus-2	Replacement Stylus for PointFinder PF-2

XYZSetter™ and ZeroSetter™

XYZSETTER™

Easy, accurate setting of any axis.

XYZSetters minimize your setup time to maximize your production time. These unique instruments allow you to precisely establish all primary references quickly and dependably. Two models are available for either front or side reading. Both models are precision made of ground, hardened tool steel. Both have dial indicators graduated in thousandths (0.001”).

Part Number	Description
XYZ-A	Front Reading XYZSetter™
XYZ-B	Side Reading XYZSetter™

Zero the dial with the master cap held in place.

Remove the master cap and position the XYZSetter™ on your workpiece. Adjust your spindle until the cutter (or a test bar) touches the unit's measuring face. Your absolute reference point is established when the unit's dial rests at zero.

ZeroSetter™

Quick, simple, precise Z-axis off setting.

ZeroSetter assures fast reliable results every time you off-set your Z-axis. Your setup time will be reduced, so you'll gain valuable production time. Made of hardened tool steel, each setter is meticulously ground for top precision. ZeroSetter establishes an absolute gauge length of 4" or 6" that serves as your primary reference point. Its dial indicator is graduated in thousandths (0.001”).

Part Number	Description
ZERO-SET4	4" Gauge Length ZeroSetter
HP-4	4" Gauge Length Height Presetter
HP-6	6" Gauge Length Height Presetter

HP-6

Spindle Wipes

Spindle Wipes

These handy wipers quick-clean your spindles, assuring that your toolholder tapers make continuous positive contact with them for repeatable on-center performance. They're also perfect for cleaning the bores of your collet chucks and Morse Taper holders.

FOR MACHINE SPINDLES

Part Number	Description

Momimem Carbide Indexable Chamfering & Center-Drilling Tools

Achieve super long life and ultra fast cutting performance.

Features

- Our new CNC multi-purpose tool's patented inserts are specifically designed to eliminate the problems of chipping at the center point associated with conventional center drills.
- Our unique toolholding system assures high accuracy and saves time when replacing inserts.
- Our single blade system eliminates cutting vibration.
- Momimem is durable (even for high speed cutting) which greatly improves productivity.
- Momimem enables centering and chamfering work to be done on the same center.

Applications

- Center Drilling
 - Corner Chamfering
 - Bore Chamfering
 - V-Groove Cutting
- Tough, accurate, economical and excellent performance.

Multi-Purpose Functions

- Spot Drilling (Center Drilling)
- Countersink and Chamfering (Plunging)
- Spiral Cutting (Milling)
- "V" Grooving (Milling)

Momimem Carbide Indexable Chamfering & Center-Drilling Tools

Indexable carbide tools for chamfering, center-drilling and v-grooving with one tool.

Momimem Chamfer/Center Drill

Part Number	L1	L2	D	d	a°	D1
SC1630C	3.27"	1.23"	5/8"	.625"	118°	.650"
SC1645C	3.35"	1.15"	5/8"	.500"	90°	.551"
SC1660D	3.75"	2.05"	5/8"	.472"	60°	.472"

Note: radius for SC1660D, SC1645C and SC1630C is 0.4, 0.6 and 0.6 respectively.

Insert

Part Number	Grade	Application
C32GUX-NK1010	NK1010	Aluminum Cast Iron (Momimen 1630 and 1645)
C32GUX-NK2020	NK2020	Steels (Momimen 1630 and 1645)
D43GUX-NK1010	NK1010	Aluminum Cast Iron (Momimen 1660)
D43GUX-NK5050	NK5050	Steels (Momimen 1660)

Note: insert package quantity: 12 pieces.

Chibimomi - CNC Multi-Purpose Center Drill and Chamfering Tools

Achieve super long life and ultra fast cutting performance.

Features

- 3/8" shank and 5/16" lip assure highly accurate machining in narrow and limited space points.
- Our originally designed patented insert eliminates cutting vibration and cracking.
- Our originally designed patented insert assures problem-free secondary deburring.
- Save time when replacing inserts because no tool compensation is needed.
- Number of toolholders in the ATC can be reduced because this can be used for spot drilling, countersinking and chamfering, bore chamfering, edge chamfering, and v-grooving.
- Greatly improves productivity due to high-speed cutting.

Applications

- Center Drilling
- Corner Chamfering
- Bore Chamfering
- V-groove Cutting

Tough, accurate, economical and excellent performance.

TQW Torque Wrench

The TQW Torque Wrench is very accurate and easy-to-use, guaranteeing maximum accuracy and preventing tool overtightening or breakage.

- Variable torque adjustable wrench
- Robust and durable
- Ergonomic grip
- Easy to read inch and metric scale
- Strong steel shaft is highly corrosion resistant
- Easy to set up and operation:
 - A. Set wrench to desired torque setting
 - B. Insert attachment
 - C. Torque down on collet nut until it clicks in place

A wide selection of attachments are available: ER, SK, TG, Pull Stud, Milling Chuck, Capto

Design and Construction

A "Push-Button Locking Device" securely locks the preset torque and prevents inadvertent adjustment.

Handle is shaped to provide a firm and ergonomic grip.
