

# Master STAGES™

*Butyl-Free/Phosphate-Free  
Floor & Multi-Purpose Cleaner/Degreaser*

## GENERAL DESCRIPTION

Master STAGES™ SkidRid™ is a highly concentrated cleaner built for multiple uses including floor cleaning and general degreasing. In addition to automatic floor scrubbers, it does a great job in general purpose cleaning, mop bucket cleaning, and parts washing in room-temperature wash tanks. SkidRid is completely free of 2-butoxyethanol (Butyl) and is not reportable under SARA section 313.

## ADVANTAGES

- Specially formulated to lift off stubborn tire marks – pre-application from a spray bottle followed by power floor scrubbing can often deal with the most difficult areas
- Contains no 2-butoxyethanol (Butyl), an ingredient of increasing concern often found in products of this type
- All of the ingredients used in SkidRid are biodegradable
- Economical to use because it is very highly concentrated - a little bit goes a long way
- Can be used for general cleaning tasks and to remove soils from parts and tools
- Hard water tolerant, SkidRid has a mild, pleasant scent
- Environmental approvals are simplified because SkidRid contains no nitrites, phosphates, barium, phenols, or butyl cellosolve; this formula has very low V.O.C. content and is not SARA 313 reportable
- Effective in immersion style washers and ultrasonic baths can be used at room temperature up to 120°F (49°C)
- An effective “mop bucket” cleaner in addition to being useful in floor scrubber machines
- Removes heavy soils from floors without lifting off floor paints, coatings, or leaving a slippery residue; thereby suitable for concrete, painted tile, or linoleum floors

## APPLICATION GUIDELINES

SkidRid is highly concentrated and should be used at low, economical dilution rates in tap water:

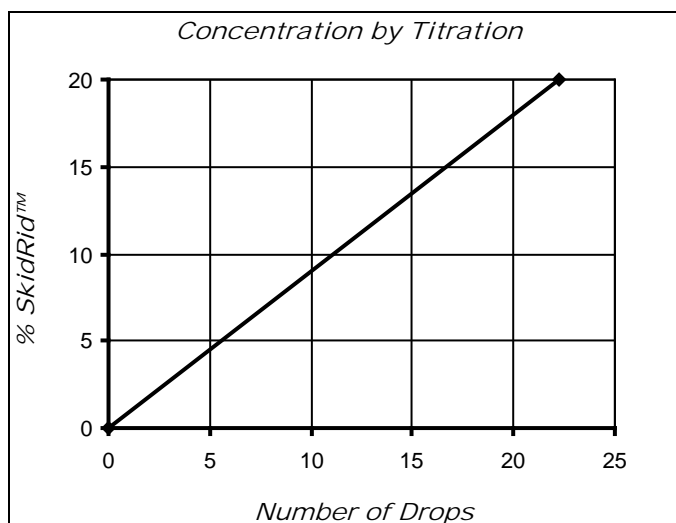

- Power washers and steam cleaners                    ½%-3%                    (3/4-4 oz. /gal)
- Floor scrubber machines                                1%-5%                    (1½-6½ oz. /gal)
- Mop buckets    5%-10%                    (6½-13 oz. /gal)
- Parts washing (cold immersion type)                5%-10%                    (6½ -13 oz. /gal)
- Hard surface cleaning                                    5%-20%                    (6½ -26 oz. /gal)
- For additional product applications information including performance optimization, please contact your Master Chemical Authorized Distributor at [2trim.us/distributors.php](http://2trim.us/distributors.php), your District Sales Manager, the Tech Line at 1-800-537-3365, or visit our web site at [www.master-stages.com](http://www.master-stages.com).

## PHYSICAL PROPERTIES (TYPICAL DATA)

Color (concentrate) .....	Clear, pale yellow	Flash Point (concentrate).....	Nonflammable (COC)
Color (working solution).....	Light yellow	pH (Typical Operating as a range).....	11.0-12.5
Odor .....	Mild	Conductivity Factor .....	0.0015
Form.....	Liquid	Titration Factor (CL-1 Titration Kit) .....	0.90

% Concentration = Conductivity in Micro Siemens x Factor  
 Conductivity Factor = 0.0015

% Concentration = No. of Drops x Titration Factor  
 Titration Factor = .90 Two Vials

### CHECKING CONCENTRATION

SkidRid concentration can be checked by titration or conductivity for working solutions.

### TITRATION

Use Master STAGES™ Titration Kit CL 1, Indicator A, and two vials of working solution.

Drops of Acid	2	4	6	11	16	22
% SkidRid	1.5%	3%	5%	10%	15%	20%

Titration Formula: Drops of Acid x 0.90 = % Concentration of SkidRid

### MIXING INSTRUCTIONS

The recommended use concentration of SkidRid is ½%-20% in water. No special mixing procedures are required. Add the required amount of SkidRid concentrate to the required amount of water and stir until uniformly mixed.

### HEALTH & SAFETY

Avoid skin or eye contact, or inhalation with spray mist.  
 See the most recent SDS at [2trim.us/s/?i=1133-en-US-US](http://2trim.us/s/?i=1133-en-US-US).

### NOTES

- Packaging: North America – 1-gallon jug, 5-gallon pail, 54-gallon drum, 270-gallon tote bin.
- Packaging: Europe/Asia – 20-litre pail, 204-litre drum, and 1000-litre IBC.
