## Superior mechanical protection and cut-resistance

PRIMARY INDUSTRIES

IDEAL APPLICATIONS

- Body assembly
- Machine tool operation
- Sheet metals and metalwork
- Assembly and finishing

## DESCRIPTION

- Constructed from high-tech Kevlar® para-aramid short fibers, the gloves give improved sensitivity and fit. The seamless construction avoids irritation and the use of short fibers offer extra comfort. In addition the PVC dots on both sides of the glove provide sure/extra grip (specific models, see specifications).
- The 100% Dupont Kevlar® construction offers a very high cut resistance to weight ratio. The use of Terry loop technique enhances heat insulation. The resulting thicker-walled glove offers high shock absorption without losing dexterity.
- Thanks to the Neptune® coating the glove fibres repel liquids, avoiding damage to the Kevlar® strands and extending glove life. The reinforced thumb welt increases abrasion resistance also adding to glove durability. The ambidextrous gloves are fully washable and can be re-used many times.

## FEATURED TECHNOLOGY

Kevlar®
