

## Spiral Point Taps

- Spiral point design aids in evacuation of chips ahead of cutting action.
- Excellent shearing action of flute due to spiral point grind.
- Ideal for production tapping of through holes.
- Has shallower flute passage giving spiral point taps greater strength.

### Why North American Tool SPIRAL POINT TAPS?

- Spiral point taps are commonly used in through holes to push chips out ahead of cutting action, and can be used in deep holes with plenty of chip clearance.
- Special design criteria (unique characteristics, geometry, design attributes) can be incorporated to allow unmatched efficiencies in your specific tapping application.
- Available in right hand and left hand cut, and in various styles such as extension, carbide, STI, stock TiN coat, metric, etc. Call for details.
- Experienced engineers, state-of-the-art equipment and production processes, advanced computer systems and machining equipment provide value-added solutions to your challenging tapping requirements.
- Cutting tools designed, manufactured and shipped in the U.S.A.

*North American Tool spiral point taps are available from stock in popular sizes and styles.*
