- Available in popular machine screw and inch sizes.
- S.T.I. thread plug gages are available.
- Specials available upon request.

Why North American Tool SCREW THREAD INSERT TAPS?

- S.T.I. (Screw Thread Insert) Taps are special taps for helical coil wire screw thread inserts.
- Provide positive means for protecting and strengthening tapped threads in any material.
- These STI taps are correctly sized to produce an internal thread that accommodates a helical coil wire screw thread insert. The insert, in turn, will accept a screw thread of the nominal size and pitch at final assembly.
- Screw thread inserts provide stronger tapped threads (stronger assemblies) due to a more balanced distribution of loads throughout the length of thread engagement.
- Cutting tools designed, manufactured, and shipped in the U.S.A.

North American Tool S.T.I. taps are available from stock in popular sizes.
