

## TAKE SANDING TO THE NEXT LEVEL

Utilizing Norton patented SG ceramic grain, Norton Dry Ice A975 offers the technician a faster cutting product that significantly out-produces and outlasts conventional abrasives. A water-based stearate No-Fil coating provides maximum load resistance, further extending the life of the product.

The incredible versatility of Norton Dry Ice is perfect for refinishing any job, including those that contain scratch-resistant clears and E-coats, composites and aluminum, eliminating the need for specialty products.

**WORK SMARTER. FINISH FASTER.**

**QUALITY THAT PAYS™**

Dry Ice is perfect for refinishing any job, especially those that require an extremely durable abrasive that cuts quicker, cuts cooler, and lasts longer without generating heat. Our engineered ceramic grain is the perfect abrasive for any job, including those with scratch-resistant clears and E-coats, composites and aluminum. Its versatility eliminates the need for additional specialty abrasives.

**FEATURES & BENEFITS**

- Norton SG ceramic grain for quicker/cooler cut with better longevity for superior cut on abrasion-resistant paints and clears
- Unique fiber-reinforced latex/paper backing is flexible and has easy removal with maximum tear resistance for increased durability
- Water-based stearate (No-Fil) improves load resistance and extends life
- Norton patented Multi-Air Cyclonic hole pattern provides enhanced dust extraction
