

CREATING A DYNAMIC DUO IN GRINDING AND BLENDING

**CLEAN
BOND®**
TECHNOLOGY

NEW Norton Rapid Prep XHD Coarse and Medium discs will solve your most aggressive stock removal and blending challenges. Remove weld lines, weld splatter, weld discoloration and blend surfaces in a single step. Use XHD Coarse discs for aggressive weld removal and surface blending on steels and Medium discs on softer metals/alloys.

Save labor time and costs too, with fewer disc changes compared to traditional coated flap discs/non-woven disc combo applications. These new discs come in three popular attachment types: TR quick-change, hook and loop, and speed-change.

KEY INDUSTRIES/MATERIALS

METAL FABRICATION | WELDING | AUTOMOTIVE | STAINLESS STEEL | ALUMINUM

KEY APPLICATIONS

MEDIUM GRINDING | DEBURRING | BLENDING | CLEANING

FEATURES & BENEFITS

- Achieve proven labor and consumable savings by reducing blending application steps vs. coated flap discs
- Improve cut control and surface blending over traditional coated flap discs and fiber discs from our unique combination of a conformable fiber matrix and premium ceramic grain
- Gain product life and shape integrity vs. your current product, whether used dry or with coolants; our blended fiber web dissipates workpiece debris while our patented Norton Clean Bond resin system produces a controlled wear rate

NON-WOVEN HOOK AND LOOP DISCS			
4-1/2" x 7/8"	40	66261170275	66261170282
5" x 7/8"	40	66261170279	66261170283
7" x 7/8"	25	66261170280	66261170284
4-1/2" x No Hole	40	66261170179	66261170183
5" x No Hole	40	66261170181	66261170185
7" x No Hole	25	66261170182	66261170186
NON-WOVEN SPEED-CHANGE DISCS			
4-1/2" x 5/8-11 Fastener	25	66261170060	66261170062
5" x 5/8-11 Fastener	25	66261170061	66261170063
7" x 5/8-11 Fastener	25	66261170288	66261170289

APPLICATIONS INCLUDE:

- **Welding** - weld grinding and surface blending
- **Aluminum Fabrication** - casting parting line removal
- **Stainless Steel Fabrication** - weld splatter removal and burn mark removal
- **Electrical** - epoxy coating and tape removal on metals
- **Automotive** - surface prep, paint/coating removal, and surface blending

Each system enables quick, safe disc changes, reducing downtime and operating expenses.

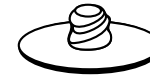

Speed Change (5/8-11)

- Features a turn-on/turn-off style fastener
- Fastener is made of metal
- Equivalent to 3M® TN locking system

Type TR (Type III)

- Features a roll-on/roll-off style fastener
- Fastener is made of plastic
- Equivalent to 3M® Roloc™ fastening system
