

RoHS Compliance Letter

May 29, 2019

To whom it may concern:

This letter is in response to concerns regarding EU directives on the restrictions of the use of certain hazardous Substances, (RoHS), Directive (EU) 2015/863, and 2002/96/EC, Waste from Electrical and Electronic Equipment, (WEEE) which addresses the possible presence of hazardous materials in our production. None of these substances are intentionally or knowingly used in the manufacturing of OSG USA, Inc's products. We have no reason to believe that any of these substances are created by our manufacturing process. As a result, we do not expect these substances to be detectable in our product and therefore we do not specify or test for a maximum level of any of these substances.

Since we do not routinely monitor for these, we can only certify that we do not intentionally or knowingly add or use the substances under this compliance. If you have any questions concerning this matter, please do not hesitate to contact our quality assurance department.

Respectfully,

A handwritten signature in black ink that reads "Michael D. Grantham". The signature is written in a cursive style.

Michael D. Grantham
