

STANLEY

PROTO[®]

Miniature Pliers

- A lightweight, versatile line of miniature pliers designed for electronics assembly, toolmaking and precision repairs.
- Miniature Pliers include diagonal, angled, and end-cutters, needle nose, duckbill and looping pliers for use in limited access or confined areas.
- Pliers are hot-drop forged with a high polish finish for strength and cleaning ease.
- Hardened and tempered jaws for strength and durability.
- Dual leaf spring design helps increase durability while allowing the jaws to be maintained in the open position for quick use.
- Slip-resistant Electro-Static Discharge (ESD) cushioned grips provide comfort and ease of use.
- Full flush and semi-flush cutting edges are honed and electronically induction hardened for long life wire cutting.
- Cushion grip handles on electrical service pliers meet or exceed the electrostatic discharge (ESD) static decay specifications for MIL-PRF-81705D and ESD S.541 (formerly EIA-541).
- ASME B107.38M and B107.25M
