

# 22-TON PIN-TYPE SAFETY STANDS - PAIR

Product # **032220** | Model # **868**

**STRONGARM®**

Pin-style safety stands by Strongarm® combine a heavy gauge steel frame, sturdy welded steel construction, and a heavy-duty holding pin to provide maximum safety and complete peace of mind while holding a load in place.

- Construction – The complete steel construction was devised for the Pin Type Safety Stands to achieve maximum durability. The large 10"x 10" base is used to increase stability when working on uneven or soft surfaces such as asphalt
- Design – Created with a large V-shaped saddle that cradles axle or other under-truck components. The braided steel cable design attaches to the pin and stand to prevent loss
- Features – These pin type safety stands feature a convenient carry handle for easy portability and usability. The multiple pin holes allow easy adjustment to the user's desired height.
- Carrying handle for easy portability
- Braided tether cable prevents pin loss
