## Recommendation

For cleaning light blemishes; secondary treatment of brushed areas; i.e. surface repairs, repainting, intermediate lacquer sanding and preparation prior to glueing or painting final coats.

# 3M™ CF-DC – Clean and Finishing

## Features

Three-dimensional Scotch-Brite™ web

Nylon non-woven web

CF Material with Aluminium oxide mineral (Type A)

CF Material with Silicon carbide mineral (Type S)

F Material

## Advantages

Uniform grain dispersion; conformable to workpiece contours

Free of corrosion-inducing materials

Tough abrasive grain

Hard, sharp grain

Softer abrasive grain

## Benefits

Consistent, repeatable finish results; won't change the geometry of the workpiece

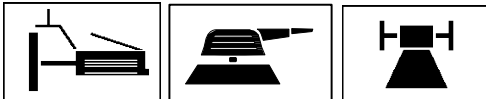

Metal pure surfaces

Fine, matt scratch pattern

Striking scratch pattern with a finer structure

Special finish; polish effect via grinding paste

## Machines

## Safety

## Quality

3M Plants are ISO 9002 certified.

*Product Use: All statements, technical information and recommendations contained in this document are based on tests or experience that 3M believes are reliable. However, many factors beyond 3M's control can affect the use and performance of a 3M product in a particular application, including conditions under which the product is used and the time and environmental conditions in which the product is expected to perform. Since these factors are uniquely within the user's knowledge and control, it is essential that the user evaluate the 3M product to determine whether it is fit for a particular purpose and suitable for the user's method of application.*
