

Endura® | 305GE

Thin TIG welding gloves with oil-resistant palms and improved dexterity for precision welding

ABOUT THE PRODUCT

Our Endura® 305GE gloves protect hands from heat hazards and are thinner than typical welding gloves for freedom of movement and better tactility for precision TIG welding. Made from elk leather, they offer ANSI 3 heat protection in a thinner shell for better dexterity and feel without sacrificing durability. They're sewn with ParaActiv™ thread for added seam integrity plus the 4-inch cuffs offer additional wrist protection and feature a pull tab for easy donning. Grain leather palms help resist oil.

APPLICATIONS

MATERIAL HANDLING, METAL FABRICATION, MIG WELDING, TIG WELDING

RECOMMENDED FOR

MATERIAL HANDLING, METAL FABRICATION, MIG WELDING, PLASMA CUTTING, TIG WELDING

AVAILABLE SIZING

M, L, XL, 2XL
