Cut-Resistant Palm Coated Gloves  
made with Dyneema®

#S13SXPU

**Dyneema®**  
The softer strength

A best seller, our Superior Touch® gloves made with Dyneema® feature polyurethane coated palms. They offer unparalleled cut protection, especially considering how highly dexterous and flexible they are. Dyneema® is one of the strongest fibers in the world, 15 times stronger than steel on an equal-weight basis, and twice as strong as Kevlar®. Gloves knit from Dyneema® have a characteristic slipperiness to them, which aids in cut-resistance, because a blade tends to slide over the surface. By adding a coat of polyurethane, the grip is improved. The 13-gauge, lint-free, continuous filament yarn, means not only do you get a finely knit glove with excellent cut protection, you also get a non-linting glove that, combined with great dexterity, making them ideal for working with everything from circuit boards to food. Light and comfortable, it's easy to forget you're wearing them, which makes them a workplace safety and compliance dream. Washable and bleachable (under 145°C).

These gloves were designed with silicone-free materials to eliminate risk of contamination of any paintline parts.

CFIA approved for food handling.
