Superior Touch®

Palm Coated Gloves made with Dyneema®

#S13SXPUQ

Dyneema®
The softer strength

Our Superior Touch® gloves made with Dyneema® feature polyurethane coated palms. They offer unparalleled cut protection, especially considering how highly dexterous and flexible they are. Dyneema® is one of the strongest fibers in the world, 15 times stronger than steel on an equal-weight basis, and twice as strong as Kevlar®. Gloves knit from Dyneema® have a characteristic slipperiness to them, which aids in cut-resistance, because a blade tends to slide over the surface. By adding a coat of polyurethane, the grip is improved. The 13-gauge, lint-free, continuous filament yarn, means not only do you get a finely knit glove with excellent cut protection, you also get a non-linting glove that, combined with great dexterity, making them ideal for working with everything from circuit boards to food.

Washable and bleachable (under 145°C).

CFIA approved for food handling.

Dyneema® is a registered trademark of Royal DSM N.V

590 grams of cut protection.

FEATURES

- Dyneema® is lint-free and provides excellent cut and abrasion resistance
- Tested at an ASTM cut level 2
- Economy version. 44 grams/pr
- Polyurethane provides great grip in wet, oily conditions
- Snug fitting, breathable, and flexible gloves are ergonomically shaped
- High dexterity and flexibility

APPLICATIONS

Sharp Steel
Glass
Circuit Boards
Automotive
Food Handling
