- 28911**-Super Kool™ Silver coated helmet w/ 4 1/2"x5 1/4" fixed front, 1.2 lbs.

Description and Performance

Sellstrom's 280 Series Welding Helmets have the traditional "Bucket Style" design that is lightweight and extremely durable. The 280 Series contains a rigid bib that deflects welding spatter making it ideal for various welding applications. The 280 Series welding helmets contain the patented Sel-Snap™ lens retention system that allows for quick and simple loading and replacing of the filter. Includes a multi adjustment 24 position ratchet headgear design with sweat band for comfort. Helmets are available with Super Kool™ High temperature paint coating to reduce inner surface temperatures up to 20% less than uncoated helmets.

- Standards Compliance**
- Helmet Shell Material**
- Cartridge Size**
- Country of Origin**

Meets ANSI Z87.1, CUL certified to meet CSA Z94.3
