A Brand® A-SFT & A-POT Features

Chip Evacuation

Excellent Chip Evacuation in Various Materials

Most tapping troubles are caused by unstable chip evacuation. The A-Tap series resolves such troubles and is applicable to a wide range of work materials and cutting conditions.

Sharp Cutting Edge

stabilizes chip shape

Variable Lead Flute

accelerates chip evacuation

V Coating

for high wear resistance

Powder Metallurgy HSS

for high wear resistance and toughness

Superior Threads

No Galling of the Work Material
